Filter Technology Mechanical engineering

Investment Offer Silent Participation

9% Basic Distribution per Year

Quotal Participation in 15% of annual Net Income The innovative and patented System For Protecting the Environment and Jobs In German Industry, 12,000 CNC machine tools are placed annually, according to the Federal Statistical Office. All Machines require, with increasingly stringent environmental Regulations, Filter systems for oil and Emulsion Mist To Protect the Environment and Machine Service Personnel.

This gives us a Market Potential of 25-30 Million EUR/s per year for 9,000 Systems.

Additional Market Potential: The Filter Systems can also be used for many other Liquid Mist Producing Applications (Food industry, cleaning Industry, textile industry, Petrochemicals, Plastics industry, etc.), Where additional Market Potential exists.
