Offer Corporate sales, firm sales, sales **Music Data Service Company**

On behalf of our clients, we provide a music data service / company in interactive customer information for sale.

Our sales offer includes one of the largest Music Databases available on the world market (excluding the classic):

In figures include the company's database on
Researched 160 000 albums and 40 million links.

In terms of data quality, for sale database of music data sets of all competitors is far superior.

Based on the amount of data entered the database with the market leader is synonymous.

The founder and music expert data available to the company after the sale to continue as an employee available.

The music database can be as interactive customer information systems use, for example, which the commercial music business on a contractual basis to use can be made available.

- An agreement for terminal licensing (currently 10 000 music Terminals Terminal around 2 € per month license fee) is given.
- The placement of banner advertising is possible
- Sales / Service from Amazon or Ebay possible.

The music service for sale is to be understood as a portal / Toolkit for interactive value added.

The music service supports the B2C side of a wealthy buyers in the selection / search advice-intensive products.

And represents on the B2B side of a very interesting service for all companies whose business model advice and / or the music sales (online store) and phonograms (Shipping / media markets) including Fanartikel is built.

Our opinion on the music database:

Data as of:

The database includes several hundred thousand musicians with the following information:

- Musicians who played in what band and what band was playing in what occupation one with which guests when that album

- Who produced this album
- The database contains over 160 000 albums and is growing day by day
- Currently, you can 40 million links
- first entry from 1941 to date
- The database covers all types of music except classical
