

Offer Corporate sales, firm sales, sales **Online Perfume**

Since I am planning a reorientation, I want to sell my web project.

It is a start-up in perfume trading. The project was founded in and has a monthly turnover of 393,000 euros and a profit of 63,000 euros.

In , the perfume business was operated only side by side and I achieved a turnover of just under 393,000 by with just one person, all the only through Amazon and only with German retailers. To get more out of the project, there are several ways to optimize: The revenue was generated only through Amazon, imagine what this would be like if you added more platforms like eBay, Rakuten, Real, Check24? There is also a dedicated shop to bypass platform-dependent commission. Here you can decide whether you want to take the already optimized Magento Shop or the JTL Shop.
