Look for Corporate follow-up, firm follow-up, follow-up

## **Metalworking**

A small/medium-sized company is being sought for full takeover (short or medium term). The main focus of activity should be the various manufacturing processes of machining technology (milling, turning, drilling, laser processing, etc.) for metal, as well as the common welding processes.

In the case of a full takeover, a short-term assistance for a regulated handover is desirable.

After middle maturity, I completed an apprenticeship and a master's degree in mechanical engineering (industrial mechanics and precision mechanics). He then studied at the Bachelor of Engineering & Master of Science in this industry. During this time, I worked in both medium-sized and large corporations.

I describe myself as very disciplined, structured, willing to learn, honest and perfectionist and bring with me a great deal of commitment.
