Offer Corporate sales, firm sales, sales

## **Campervan rental company**

Selling a well-established company, that is renting out low budget campervans from Slovenia, however, the business is easy to relocate to any other country.

It's a young company, operating since , and the reason to sell is a personal one, as campervan business is trending.

We have an amazing website and great customer service, with an outstanding website and online presence. Our campervans are ready for a younger market of millennials but could be expanded to cater to a wider market.

The business has also received many inquiries for franchising.

Looking forward to finding someone that can take this business to a new level, as it can become a big regional / European campervan business.
