

Look for Corporate follow-up, firm follow-up, follow-up

HVAC trade and renewable energies

I am a trained plant mechanic for sanitary, heating and air conditioning technology (specialization: thermal engineering) and studied engineering (B.Eng., industrial engineering, focus: renewable energies).

After my apprenticeship, I worked in construction management in the field of heating construction. I am currently working as a project engineer and expert in the field of technical building equipment.

I am looking for a possibility of company succession or participation in northern Germany or southern Europe. Please send me a short description of the offer as well as your contact details. Thank you in advance.

With kind n
