Look for Corporate financing, investor

Fashion trade for individual refinement

With our online shop we sell our own brand. After a year on the market, we realized that there was great potential. Unfortunately, bringing your own brand onto the market is very time-consuming. That's why I thought about enlarging my company and expanding it to four business areas.

1. Online shops
2. DTG and DTF printing for own as well as external textiles
3. Offer embroidery for own and external textiles
4. Refining sneaker shoes

I also have a customer for regular orders.

And otherwise the order situation in my region looks very good, especially for companies such as driving schools, restaurants and clubs I could get many orders. We can also create very good offers for private customers in terms of price. We will offer all of this both stationary and in online shops.

Thank you in advance for your interest
