Healthcare, Data Processing

I have been working in the healthcare environment for 15 years, with a focus on pharma operations, healthcare technology and data analysis.

I have recently managed large areas and am looking for a new challenge due to a restructuring.

Due to my many years of experience as an employed manager and managing director, I would like to dedicate my next step to independent management.

Thanks to a generous severance payment and a good family background, the focus is on participation, company succession, or the purchase of a company.

Succession

Region 12, Germany

Entry in own name
