Digital Agency

Introduction

We are a growing and already solidly established agency (approx. 5 years since foundation) in northern Germany for strongly data-driven existing customer marketing, which also uses AI solutions on a daily basis and is therefore future-oriented.

The distribution of the agency shares currently extends to 2 shareholders, one of whom is also the managing director with proven many years of leadership and management experience (including already employed managing director of several companies). The other shareholder is not active, but offers input from his own network.

Company Details

The agency was founded almost 5 years ago and since then has been able to grow annually both in sales and in the team. There is a clear focus (not a "vendor agency") that focuses on existing customers or retention marketing in conjunction with CDP/CRM solutions and the addition of AI solutions.
