Plasterer-painter company

We have an average monthly turnover of â,-60-80,000, there have also been months where we have cracked the â,-100,000.

We imagined about 250-300,000â,-. Of these, the buses, e.g. Part of it is still financed, bought out of the bank, which then goes into the company.

In principle, you sit down at the set table and can get started immediately. No annoying employee search or investing in machines.

All you need is orders and you're ready to go. Here, too, we can help. Over the years, we have made many contacts with architects and other companies with whom we are associated.

I don't think much needs to be mentioned about the potential in the region.
