Look for Corporate financing, investor **Car Wash**

New construction of a textile car wash with adjoining self-service washing areas.

The total land area of the commercial property B105/Messestr. is approx. 3960 sqm and is leased. The commercial property is ideally suited for the operation of a textile car wash with self-service washing areas.

Description: The customer drives his vehicle through a so-called pre-spray soaking curve into the pre-wash zone of the car wash. There, the vehicle is prepared by a service employee with a special high-pressure device and mechanical treatment for travel through the individual washing segments. Subsequently, the customer is directed to the conveyor belt by instruction. The customer selects his washing program and can observe the individual washing units during the subsequent washing process.

On the outdoor area there is a spacious vacuum cleaner system, a mat brush and various self-service machines with care products that are offered to the washing customer for use.
