Offer Corporate sales, firm sales, sales

Model making, 3D printing, production, trade

Production and sale with the help of 3D printing technology.

For all those who want to start their own business with 3D printing technology, I have the chance here. I worked on this project for two years. Models created, contacts made for the purchase of commercial models. Have models made and and and.

Now I have been successfully selling resin models in various scales since the end of last year. Most models are designed for the following scales. 1:220 – 1:35. Models that can be printed on a larger scale are mostly kits and are not suitable for scales smaller than 1:87.

All models that are for the smaller scale are not suitable for larger than 1:87.

Currently, there are over 500 models from the military sector.

A list can be requested.

The licenses are clearly separated by article number.
