Building waterproofing and crack repair company

Description

Buyer Profile:

Construction tradespeople and civil engineers with entrepreneurial ambitions who want to realize their dream of establishing their own business on a relatively secure foundation in one of Germany's most promising real estate regions.

In addition, companies and businesses from the construction and real estate industries who want to strategically expand their range of services in the -Brandenburg region in the field of building construction and invest in a functioning company with an excellent market presence.

The areas of application include general building construction, maintenance, and historic preservation. Services are provided using the latest technologies. There is close cooperation with specialist planners such as architects, structural engineers, and building condition analysts.

The company is both competitive and crisis-proof. Even taking into account current economic and political decisions, there is a stable and steadily increasing order volume in the areas of historic preservation, renovation, and repair work. The earnings situation has steadily increased (2024 return on sales: 35.95%) and allows for a very optimistic forecast for the future.

History:

The company has been operating successfully for over 20 years and has built an excellent reputation in the area for building waterproofing and crack repair.

Employees:

Up to 8 (freelance) employees who have been trained in the repair techniques for many years and receive regular training.

Customers:

The customer base consists of property managers/property management companies, construction companies, architects, and engineering firms, who are regular and long-standing customers of the company and are also constantly growing, as well as a steadily increasing number of private clients.

The company is being offered for sale due to age.
