Property management

I am offering my property management company founded in 2024 for sale. Since starting as an independent property manager, I have successively taken 21 WEG properties under management and created a solid foundation for further growth.

Growth Potential & Development:

In 2024, the year it was founded, a turnover of €13,254 was already achieved - despite the induction phase and development work. For 2025, sales of €70,746 are forecast – and the trend is rising. The continuous demand is through word of mouth, recommendations, Google listings, as well as dedicated property manager forums.

Contractual security:

All managed properties are condominium administrations with contracts for a period of 2-3 years, which guarantees a stable planning basis and regular income.
