Pig Farming Complex

Pig Farming Complex

Facility Size: 170,000 m² (17 ha) of owned farmland

Additional Agricultural Land: 4,180,000 m² (418 ha) under long-term slurry application contracts

Total Reach: 435 ha of operational land — unmatched in scale and potential

Livestock Capacity: Over 5,600 pigs, including fattening pigs, sows, and piglets, spanning a full-cycle production—from insemination to slaughter

Fully Integrated Infrastructure: Includes 6 modern pig housing blocks (12 buildings), advanced ventilation, on-site slaughterhouse (leased), and optimized feed formulas with ~80% grains

Expert Management & Workforce: Efficient, small-team operations with 15 experienced professionals ensuring smooth production and compliance

Manure Management: Two 1,200 m³ interim storage tanks and a 6,350 m³ lagoon with cover and mixers—cuts emissions by up to 85%

Green Energy Partner: All manure is directed to biogas production via a contract with SIA “BIO Auri”, reinforcing sustainability

Fully compliant with EU and Latvian environmental standards (BAT, Nitrates Directive, odor and waste controls)

Wastewater (up to 24,000 m³/year) treated or transferred to biogas facility; routine environmental monitoring (air, water, noise) in place

Stable operations supported by a valid Category A environmental permit (No. JE11IA0001), issued 15.08. and amended 24.08.

Strong partnerships with SIA “BIO Auri”, SIA “Irvine” (slaughterhouse), and multiple farms for slurry application—ensuring operational continuity

Excellent value for investors seeking to enter or scale in livestock production, integrate biogas energy, or capitalize on agri-food and sustainability trends
