## **Leisure Real Estate Projects - Hotel Projects**

### Description

For reasons of age, real estate projects in the direct lake location in the North Bavarian Lake District, among other places, are handed over. Land partly in personal ownership. Projects were developed for the fund group, which was planning a lake fund for northern Germany. For personal reasons, another recycling is now preferred

1. Holiday apartment complex (50 units, preliminary decision), property 4,450 sqm - attractive preliminary planning - quiet lake location
2. 26,000 sqm with preliminary planning ( long-term project ) with additional large area - perspective plot - low price
3. 5000 sqm plus (lakeside location, 4-5 star hotel) - property can be taken over cheaply due to the preparatory work

Particular interest in medical and health concepts with very concrete possibilities. These are suitable for increasing the occupancy rate of holiday projects / holiday apartments / hotels; in particular to ensure occupancy during the low season.
