Investors wanted for silent start-up financing

For a young company founded two months ago, an investor is being sought for a silent financing of â,~50,000 with a term of 36 months.

The company is currently in the early development phase. The basic structures have been created, the business model has been worked out and the production preparations have largely been completed. However, due to limited own funds, there are teething problems, especially in financing the first production steps and the market launch. Without additional liquidity, it is currently only possible to a limited extent to generate sales and fully exploit the existing potential.
