Production of upholstered furniture

For sale is a traditional upholstery company that manufactures upholstered furniture and also refurbishes upholstered furniture.

This includes the property, which stands on a 5830m² plot.

The main building consists of a storage area of approx. 830m², an exhibition area of approx. 580m², a production area of approx. 800m², two apartments of approx. 80m² each.

A separate office building with an area of approx. 200m² and a warehouse of approx. 133m² is also on the site.

The buyer also receives all machines, tools, the stock of raw materials, the manufactured exhibition goods and a delivery vehicle.

The company also operates 4 rented sales outlets in the new federal states.

These can be taken over if you are interested, as they have been located at established locations for several years. However, the takeover of the branches does not necessarily have to take place.
