Look for Corporate participation, firm participation

Solar-Fences

We are looking for an investor for our solar fence systems. We produce various models in absolutely top quality at a very affordable price. Due to ever-increasing energy costs, and the fact that with usual rooftop systems the electricity is produced at noon and can hardly be fed into the grid anymore, our systems are highly interesting. Sold at about 50% of the cost of a rooftop system with the same output, and the electricity is produced in the forenoon and afternoon. There are also various models in stone look or wood. If interested, just get in touch. There are different possibilities for participation.
