Property management

I am currently looking for an established property management company to take over and buy in the Baden-Württemberg area.

Locations such as Stuttgart, Munich or Heilbronn are particularly interesting for me, but other locations in the Baden-Württemberg area could also be considered.

I am looking for a company with grown structures and an existing portfolio of administrators.

Discretion as well as respectful and professional interaction in the context of a possible succession plan are a matter of course for me. My goal is a sustainable continuation and further development of the acquired company.

If you are thinking about handing over yourself or can establish a corresponding contact, I look forward to hearing from you.
