Physiotherapy

For sale is a physiotherapy practice that has been established for decades in an attractive location in the am Main area. The practice has a patient base that has grown over many years, a well-maintained patient database with more than 22,500 contacts and a very good regional network.

The range of services includes a wide range of physiotherapy services with a focus on orthopaedics, paediatrics, surgery and neurology, among others. The practice has a modern structure, several treatment rooms, a training area and an experienced and well-rehearsed team.

The combination of high location frequency, stable demand, low local competition and further growth opportunities, especially through the expansion of the employee base and possible synergies with existing practices or healthcare providers in the region, is particularly attractive.

The sale will take place as part of an orderly succession plan.
