The company has been significantly streamlined, optimized and financially adjusted in recent months. After a difficult market and conversion phase, the year 2026 shows a clear positive development again.

Preliminary key figures until 2026 according to the current BWA:

Turnover: approx. 555,000 €

Gross profit: approx. 236,000 €

Gross profit ratio: approx. 42 %

Preliminary operating result according to BWA: approx. 93,000 €

Preliminary earnings before taxes according to BWA: approx. €91,000

Since individual cost items have not yet been finally booked or deferred, the result must be viewed cautiously. Even after realistically taking into account these still open bookings, there is still a clearly positive operating result.

Based on the current development, an annual turnover of approx. € 1.3 to 1.5 million seems realistic with a stable trend. The exact development depends on the season and must be assessed as part of an examination.
