Existing GmbH with IT/AI business purpose

An existing German GmbH with a modern business purpose in the field of IT consulting, software development, implementation of IT solutions, artificial intelligence, neural networks and semantic search engines is offered for sale.

The company currently has no active business operations, no employees, no debts and no shareholder loans. There are only accounting losses from previous periods.

The company became inactive after one of the project partners withdrew for personal reasons. As the structure is no longer needed, a sale is being considered instead of keeping the company inactive.

The GmbH may be suitable for buyers who would like to take over an existing German GmbH structure with an IT/AI orientation, without setting up a new company from scratch.

The shareholder structure is transparent and can be disclosed during the due diligence process.

The sale will be carried out exclusively through a German notary. Notary and transfer costs are to be borne by the buyer.

Detailed documents will only be provided for confidentiality reasons after the interested party has been reviewed and, if applicable, after a confidentiality agreement has been signed.
