Offer Corporate co-operation, firm cooperation

Measuring technology - Company

I am looking for partners to start a business in the field of optical measurement techniques and services. A business plan exists. We are still looking for co-founders from the fields and, with knowledge of software development (C++), measurement technology, construction and, if necessary, optics. Experience with ISO/DIN 9000 (quality management) would also be beneficial.

Planned date for the foundation: approx. summer or autumn

[Co-operation](#)

Region , Germany
