Pizza franchising system

I would like to join a system of a pizza delivery service in Germany with over 100 franchise branches. Customer profile of this system restaurateur:

Strong growing market. Very good return, as you can see from the example of the other franchisees. In the Stuttgart area, only one other franchisee is represented. I am particularly interested in room or Stuttgart Mitte preferably in B-location.

For this project, a capital requirement of approx. 180 TEU is expected for the property, the franchise fee, furnishing, know-how, vehicle fleet, etc.

Capital can be repaid within about 4-5 years with a better return than with conventional investment methods. It would also be conceivable that the investor would participate in the long term as a still shareholder with a profit distribution of 30%. with full transparency of all business activities and access to all documents. A daily income and notarial hedging of your capital.
