Software download portal

Dear Lady, Dear Lord,

We successfully operate a software download shop (entry. Brand since 2000) aspire to Internationalisation (the first concrete Approach is Spain) and therefore need Capital that equips us with the necessary Pace for our future Activities and Independence.

We already have very successful Collaborations with almost all German computer magazines (from PC World to ComputerBILD) and Sales Collaborations with Bertelsmann And Companies, among Others.

We have our Licenses (about 250) exclusively for the whole of Europe for various Distribution Channels.

Would this Be interesting for You? For Example, as a "silent Partner"?

Information about us and our Business Model can be found On our Websites, which we are happy to share with You and, if you wish, we will be happy to send You our basic presentations, which will give You a good Insight into our Business.
