

Look for Corporate participation, firm participation

## **Sales company for environmental technology**

We are a young company that is involved in the distribution of high-quality environmental technology.

For reasons of capital determination, we are looking for a participation in our Distribution company for ceramic lubricants. The advantage for the Consumers here are at least 10% more fuel-efficient.

Especially in the age of high fuel costs, freight forwarders in particular and bus companies have become our clientele.

In the first step, we have the necessary experience on site at the customer's to deliver our products specifically "to the man." In the second

Step is now in the foreground of the expansion of the distribution network.

In order to be able to expand our distribution network sensibly, we need capital.

A promising business plan of an independent

Management consultant, of course.

We are happy to introduce ourselves and our company personally.

### [Participation](#)

Region 84, Germany

Entry in own name
